

OpenText™ Software Security Center v23.2.1

Patch Release Notes

Document Release Date: December 21, 2023

Software Release Date: December 21, 2023

Products and/or Components Updated with this Patch

Fortify Software Security Center

Fixes

The patch includes bug fixes and quality enhancements that improve application stability.

This patch includes the following updates:

- Library upgrades to remediate security issues
- You can now generate .xlsx formatted reports based on non-pre-defined Fortify report templates.

To generate .xlsx reports that are not based on a pre-defined Fortify report template:

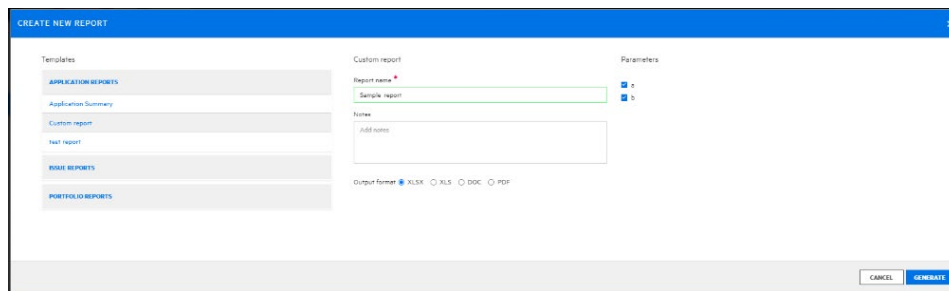

1. From **Administration > Templates > Report Templates**, import or use an existing non-Fortify custom report `rptdesign` file.

The ADD NEW PARAMETER dialog box appears.

2. Add a new **Name**, an **Identifier** of `enableXlsxGeneration`, and select a **Data Type** of `Boolean`. Click the **APPLY** button.

3. After adding the `enableXlsxGeneration` parameter to the custom report template, the `xlsx` output format option will be available in the CREATE NEW REPORT dialog for the custom report.

Confirm the **Report name** and optionally, add **Notes** on the report and then click the **GENERATE** button.

Note: Pre-defined Fortify Reports do not support `.xlsx` report generation. This feature is only supported for custom reports.

Documentation

- There are no documentation updates required for this patch. Use the latest versions of the documentation created for 23.2.0.

Fortify Software Security Center Installation Notes

Note: Always back up your system before installing a patch.

To install this patch:

1. Unzip the `Fortify_23.2.1_Server.zip` file. You will find the following zip file:
`Fortify_23.2.1_Server_WAR_Tomcat.zip`
2. Unzip the `Fortify_23.2.1_Server_WAR_Tomcat.zip` file. It includes a patched version of the `ssc.war` file.
3. Stop the Tomcat server.
4. Navigate to the `/webapps` directory.
5. Remove the 23.2.0 version of the `ssc.war` file and replace it with the new `ssc.war` file.
6. Start the Tomcat server. Fortify Software Security Center will start up in maintenance mode.

For information about maintenance mode, see the *OpenText™ Fortify Software Security Center User Guide*.

7. Restart the Tomcat Server.

Support

If you have questions or comments about using this product, contact Customer Support.

When contacting Customer Support, provide the following product information:

Software Version: 23.2.1
