

## **Fortify Static Code Analyzer v23.1.1**

Patch Release Notes

Document Release Date: July 5, 2023

Software Release Date: July 5, 2023

### **Products and/or Components Updated with this Patch**

Fortify Static Code Analyzer

#### **Updates**

- **Xcode 14.3.1 support**
- **Support for Dart builtin field and array access with dynamic types**

#### **Fixes**

The patch includes bug fixes and quality enhancements that improve application stability. This patch addresses the following issues:

- Reduction in translation time for Flutter projects due to translation optimization. (D866001)
- Issue running `FortifyUpdate` when using a proxy that requires authentication. (D852011)
- Issue generating `.binlog` files when executing translation with the MSBuild build adapter in select environments prematurely terminating the translation. (D820012)
- Issue with Regular expression analysis exhausting available file handles during scan. (D860002)

#### **Documentation**

- There are no documentation updates required for this patch. Use the latest versions of the documentation created for 23.1.0.

### **Fortify Static Code Analyzer Installation Notes**

**Note:** Always back up your system before installing a patch.

1. Install the patch.

To install this patch, see “About Upgrading Fortify Static Code Analyzer and Applications” in the *Micro Focus Fortify Static Code Analyzer User Guide*.

2. Run the `fortifyupdate` utility to update the Fortify Software Security Content.
