Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit https://www.microfocus.com/support-and-services/documentation/.

Support

Visit the MySupport portal to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- Search for knowledge documents of interest
- Access product documentation
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts
- Submit and track service requests
- Contact customer support
- View information about all services that Support offers

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in. To learn about the different access levels the portal uses, see the Access Levels descriptions.

Contents

New in this Release

The following new features were released in Query Manipulation Server version 12.10.0.

- `FieldText` restrictions in `TypeAhead` actions (`action=TypeAhead&Mode=Index&Text=...&FieldText=...`) are forwarded to the IDOL Content component `TermExpand` action (requires IDOL Content 12.10).

- The third-party libraries libxml2 and libxslt have been updated, to versions 2.9.11 and 1.1.34 respectively.

Resolved Issues

The following issues were resolved in Query Manipulation Server version 12.10.0.

- The `TypeAhead` action (with `Mode=Index`) failed to return results when the IDOL Content component was configured with `RequireSecurityInfo=TRUE`.

- The `TypeAhead` action (with `Mode=Index`) could return an extra, empty expansion suggestion when using a DAH to retrieve `TermExpand` results from the IDOL Content component.

- An issue with the Lua document tracking library could cause QMS to terminate unexpectedly when an invalid data file was present in the `doctrack` directory. An invalid data file could exist after an interruption of service, such as a loss of power to the server.

Supported Operating System Platforms

Query Manipulation Server 12.10.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 6
- CentOS 6
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

Solaris (x86-64 and SPARC 64)

DEPRECATED: Support for Solaris x86-64 and SPARC 64 was deprecated in IDOL version 12.10, for all IDOL components except KeyView. IDOL components are currently still available for Solaris, but might not be available in future.

- Solaris 11
- Solaris 10

Documentation

The following documentation was updated for Query Manipulation Server version 12.10.0.

- *QMS Administration Guide*
- *QMS Reference*
