Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- View information about all services that Support offers
- Submit and track service requests
- Contact customer support
- Search for knowledge documents of interest
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in.

Contents

- New in this Release 4
- Resolved Issues 5
- Supported Operating System Platforms 6
- Documentation 7

New in this Release

The following new features were released in SharePoint OData Connector version 12.12.0.

- Documents ingested by the connector include a field named SITELOCALEID that provides information about the locale used in SharePoint.

Resolved Issues

The following issues were resolved in SharePoint OData Connector version 12.12.0.

- When processing list items, an issue with paging meant that the connector could fail to index documents for all of the items if there were more than 1000 items in the list.
- When a binary container file was updated in SharePoint, the connector would ingest-add the file rather than using an ingest-replace (a remove followed by an add). If a SharePoint user removed files from the container, documents that should have been deleted were left in the IDOL index.
- **(Security update)** The third-party OpenSSL library has been upgraded to version 1.1.1n to resolve a security vulnerability, CVE-2022-0778.

Supported Operating System Platforms

SharePoint OData Connector 12.12.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 7
- CentOS 7
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

Solaris (x86-64 and SPARC 64)

DEPRECATED: Support for Solaris x86-64 and SPARC 64 was deprecated in IDOL version 12.10, for all IDOL components except KeyView. IDOL components are currently still available for Solaris, but might not be available in future.

- Solaris 11
- Solaris 10

Documentation

The following documentation was updated for SharePoint OData Connector version 12.12.0.
