Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- View information about all services that Support offers
- Submit and track service requests
- Contact customer support
- Search for knowledge documents of interest
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in.

New in this Release	4
Resolved Issues	5
Supported Operating System Platforms	6
Documentation	7

New in this Release

The following new features were released in Distributed Action Handler version 12.13.0.

- ACI servers that are using an OEM license (or Enterprise OEM license) can now accept HTTP multipart/form-data in a POST request. The request URL must be encrypted to ensure that the client has access to the OEM keys. The multipart/form-data POST request is in plain text.

Resolved Issues

The following issues were resolved in Distributed Action Handler version 12.13.0.

- When processing state tokens submitted in a `StateMatchID` or `StateDontMatchID` parameter, DAH stopped processing any further state tokens when it encountered a docid-based state token that it did not recognize. This resulted in hits being incorrectly included (for `StateDontMatchID`) or excluded (for `StateMatchID`).
- Adding a new child engine with the `EngineManagement` action could result in a later interruption of service when querying in mirror mode.

Supported Operating System Platforms

Distributed Action Handler 12.13.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2022
- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 7
- CentOS 7
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

Documentation

The following documentation was updated for Distributed Action Handler version 12.13.0.

- *Distributed Action Handler Reference*
- *Distributed Action Handler Administration Guide*
