Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- View information about all services that Support offers
- Submit and track service requests
- Contact customer support
- Search for knowledge documents of interest
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in.

Notes	7
Documentation	8

New in this Release

The following new features were released in TeamBinder Connector version 12.13.0.

- The connector can retrieve transmittal attachments. A new configuration parameter named `ProcessTransmittalAttachments` has been added with a default value of `TRUE`.
- The connector can retrieve all document comment attachments. A new configuration parameter named `ProcessDocumentCommentAttachments` has been added with a default value of `TRUE`. In earlier versions of the connector, only the first attachment was retrieved for each document comment.
- Mail attachments, document comment attachments, and transmittal attachments are indexed into IDOL as separate documents. The document content for mail, comment, and transmittal documents now contains the message body.
- The connector extracts information about the sender and recipient for a mail or transmittal, and includes this information in the document metadata.

Resolved Issues

The following issues were resolved in TeamBinder Connector version 12.13.0.

- The connector was not able to send documents to an Apache NiFi input port when authentication was required.

Supported Operating System Platforms

TeamBinder Connector 12.13.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2022
- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 7
- CentOS 7
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

Notes

- The configuration parameter `MailZipSingleFiles` has been removed, because all mail attachments are now indexed as separate documents.

Documentation

The following documentation was updated for TeamBinder Connector version 12.13.0.
