Documentation updates

The title page of this document contains the following identifying information:

- Software Version number, which indicates the software version.
- Document Release Date, which changes each time the document is updated.
- Software Release Date, which indicates the release date of this version of the software.

To check for updated documentation, visit <https://www.microfocus.com/support-and-services/documentation/>.

Support

Visit the [MySupport portal](#) to access contact information and details about the products, services, and support that Micro Focus offers.

This portal also provides customer self-solve capabilities. It gives you a fast and efficient way to access interactive technical support tools needed to manage your business. As a valued support customer, you can benefit by using the MySupport portal to:

- View information about all services that Support offers
- Submit and track service requests
- Contact customer support
- Search for knowledge documents of interest
- View software vulnerability alerts
- Enter into discussions with other software customers
- Download software patches
- Manage software licenses, downloads, and support contracts

Many areas of the portal require you to sign in. If you need an account, you can create one when prompted to sign in.

New in this Release

The following new features were released in Web Connector version 12.13.0.

- The embedded web browser in Web Connector has been upgraded to Chromium 102.0.5005.57. (Apart from the FIPS-compliant platforms, which use Qt Webkit 5.1.1).

Resolved Issues

The following issues were resolved in Web Connector version 12.13.0.

- Synchronize tasks could take longer than expected. This was caused by communication issues between Web Connector and its embedded browser (WKOOP), which would ultimately lead to WKOOP timing out and producing an error. This issue affects Web Connector versions 12.8 to 12.12.
- When a website was synchronized incrementally over a secure (HTTPS) connection, and the connector received an HTTP 304 (not modified) response from the server, the response was not handled correctly and the message "Failed To Load Page, Load Timed Out" could be seen in the logs. This would cause the synchronize task to take longer than necessary.
- In some cases the connector did not start correctly and the message "Too many sequential errors starting WKOOP" would appear in the logs. This issue has been resolved by reducing the amount of memory used by WKOOP on startup.
- The GetWeb processor (for IDOL NiFi Ingest) would always use a local state database, even when an external database was configured.
- The connector was not able to send documents to an Apache NiFi input port when authentication was required.

Supported Operating System Platforms

Web Connector 12.13.0 is supported on the following platforms.

Windows (x86-64)

- Windows Server 2022
- Windows Server 2019
- Windows Server 2016
- Windows Server 2012

Linux (x86-64)

The minimum supported versions of particular distributions are:

- Red Hat Enterprise Linux (RHEL) 7
- CentOS 7
- SuSE Linux Enterprise Server (SLES) 12
- Ubuntu 14.04
- Debian 8

NOTE: On Linux platforms there are some prerequisites that you must install. For more information, refer to the Web Connector documentation.

Documentation

The following documentation was updated for Web Connector version 12.13.0.
